Re: 0310810003- Cook County
Veolia-Evanston Transfer Station
Compliance File

Dear Mr. Ray:

On December 19, 2019, an inspection of the above referenced site was conducted by Andrew Nowak representing the Cook County Department of Environment and Sustainability. The purpose of this inspection was to determine the site's compliance with the Illinois Environmental Protection Act and 35 Illinois Administrative Code regulations. In addition, site compliance with the provisions of its operating permit was also evaluated.

No violations were noted at the time of this inspection. For your information, a copy of the inspection report is enclosed. Please contact Andrew Nowak at (312) 758-4141 if you have any questions regarding this inspection.

Sincerely,

Andrew Nowak

Inspection Report

Inspection Type:

☐Complaint ☐Commercial ☐Industrial ☒Waste/Recycling ☐Asbestos ☐Demolition
☐ Other:

Observations and Comments:

Engineer Nowak conducted a solid waste inspection of Veolia-Evanston Transfer Station to determine site compliance with permit 1984-2-DE/OP; 2013-005-SP and applicable regulations. Nikki and Arturo were interviewed during the inspection and later Douglas Ray sent documentation. The weather was sunny and 26°F.

The site is approximately one acre in size and contains an office trailer, scales, and a transfer station building. One of the scales was being repaired at the time of inspection. The northern, eastern, and western neighboring properties are residential properties and the south end of the site accesses Church Street. MSW is accepted at the site. No recycling is accepted.

In November 2019, the site received 10.099.82 tons of MSW, while 10,133.83 tons of MSW were outbound from the site. Additionally, 2.73 tons of construction and demolition materials were received by the site. No mattresses or tires were received during this period.

Engineer Nowak observed garbage trucks dumping loads of MSW within the transfer station building, along with a small U-Haul vehicle. A bulldozer was piling up the MSW and loading it onto a truck. A fire extinguisher was observed onsite and had a 2019 tag. Nikki, who was working the scale and training Arturo, said the site uses Men-In-Black for vector control. The site sweeps up litter and the street outside the facility daily. Nikki said the site has a misting system for odor control.

The west wall of the site was lined with garbage cans. There was a light amount of litter and Engineer Nowak observed Arturo picking up the litter and filling the garbage cans. No malodor, runoff, unattended litter, or dust were present at the time of inspection. No violations were observed during the inspection.
