SCORE: 70

## ATHLETIC FIELDS

Baseball field at James Park

### Issues Observed

### Athletic Field Notes

Inspection included all athletic fields (soccer, baseball, etc.) in a public open space, including accompanying surfacing, fencing, seating, lighting, and landscaping.

Athletic fields suffered from surface issues including weeds in both infields and turf, as well as other turf issues and worn or bare spots from use. Fencing was also found to be poor at athletic fields. In parks where these problems cannot be solved without replacement, there may be opportunities for cost savings by completing similar fencing improvements in multiple parks as one project.

# BEACHES

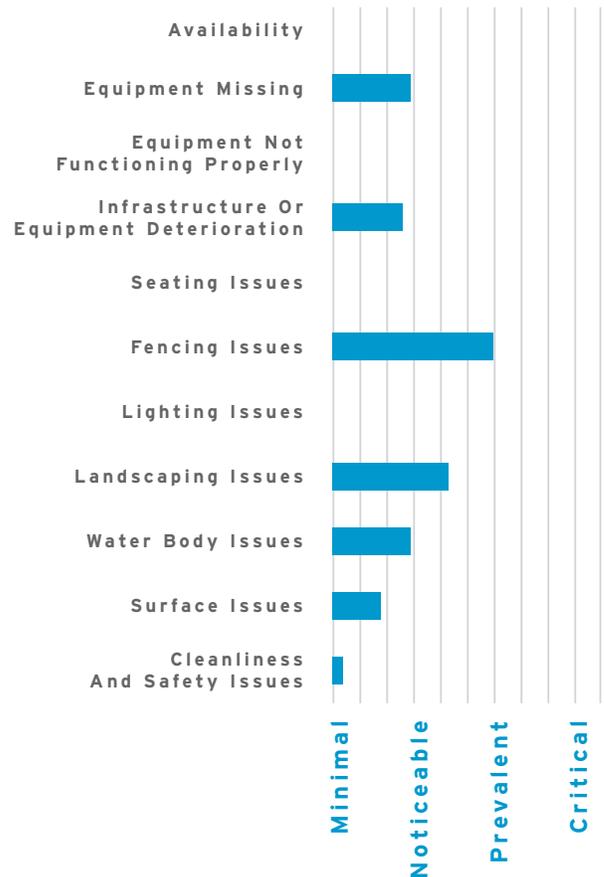

# C

SCORE: 72

Equipment at Lee St Beach

## Issues Observed

## Beach Notes

Inspection included all beach areas in a public open space, including accompanying surfacing, fencing, seating, lighting, landscaping, signage, and other equipment.

Beaches, one of the most valued features provided by the City of Evanston, would benefit from improved fencing and landscaping. Seating issues were found in all areas, but especially at athletic fields. Repainting/refinishing wooden benches and replacing decaying wood planks system-wide is recommended as a first step to address seating issues.

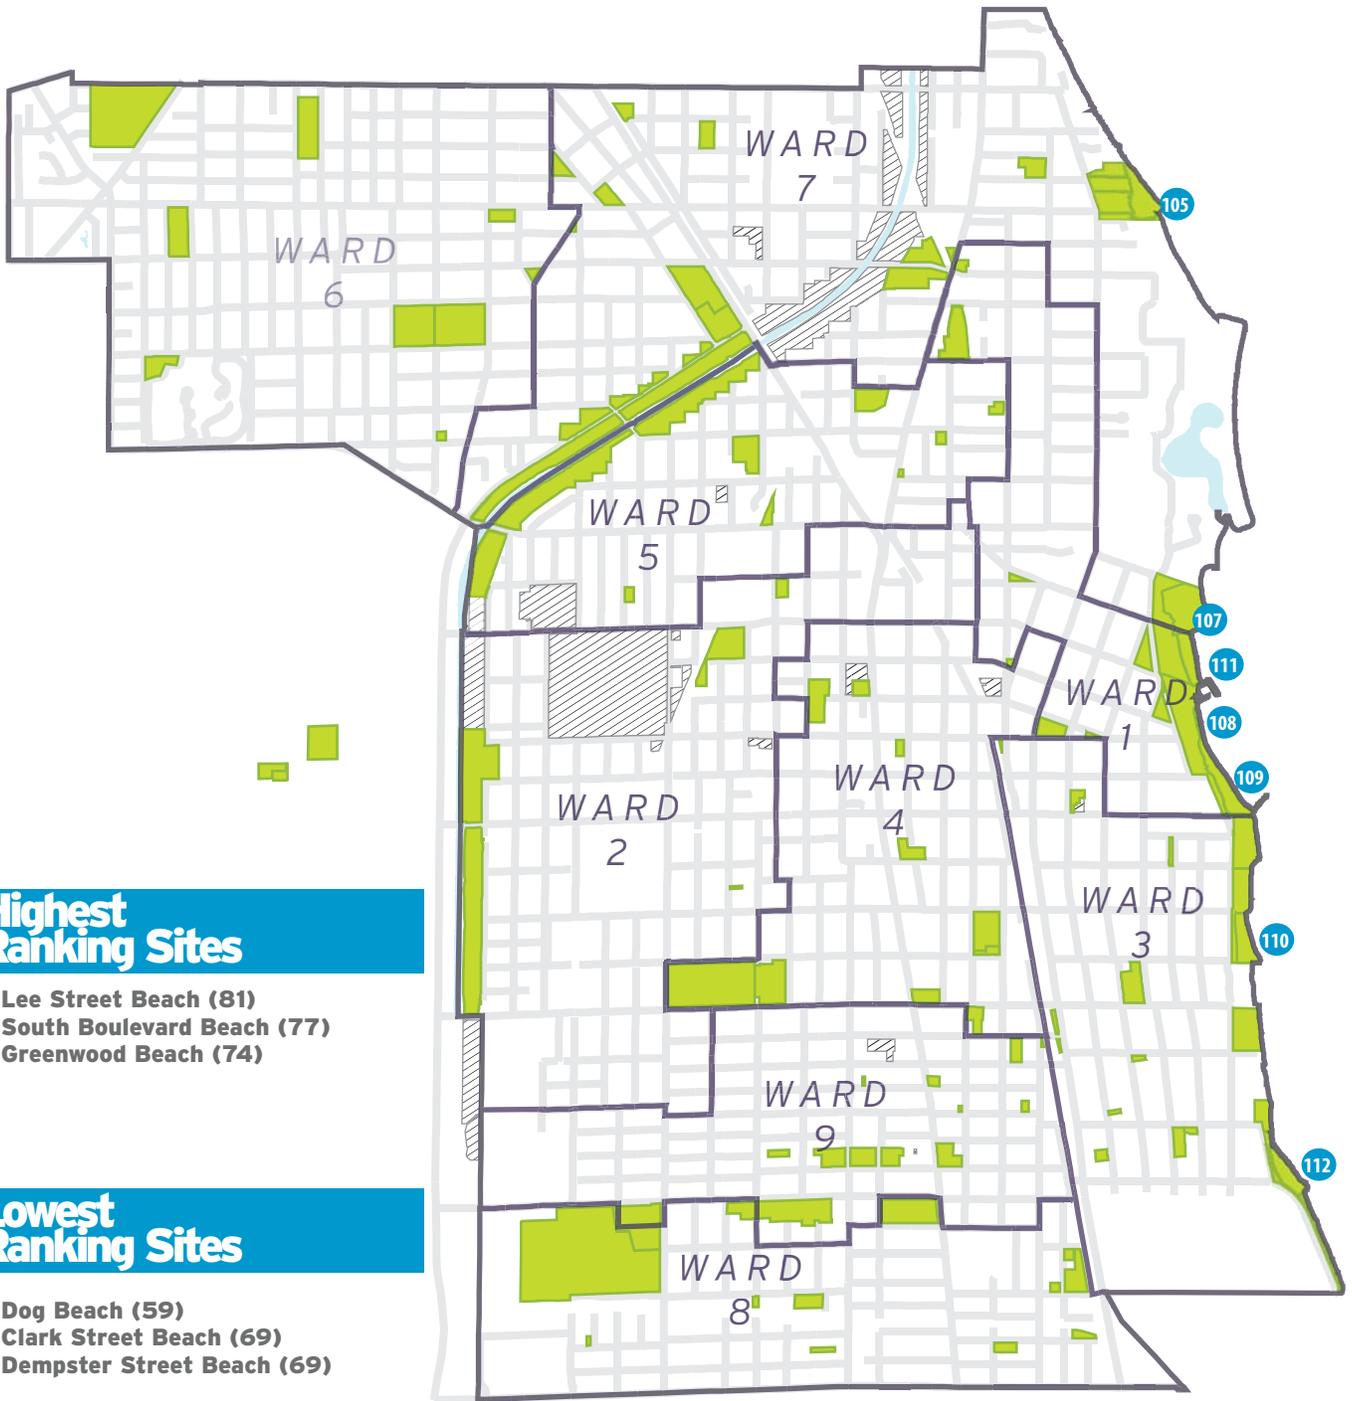

Path at South Boulevard Beach

Unsecured snow fencing at Greenwood Beach

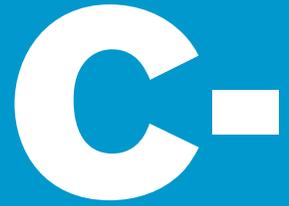

Boating activities at Dempster St Beach

# DRINKING FOUNTAINS

Drinking fountain in good condition at Snyder Park

## Issues Observed

## Drinking Fountain Notes

Inspection included all individual drinking fountains in a public open space, including associated surfacing and equipment.

Many drinking fountains suffered from deterioration issues and 38% of drinking fountains inspected had some sort of functionality issue.

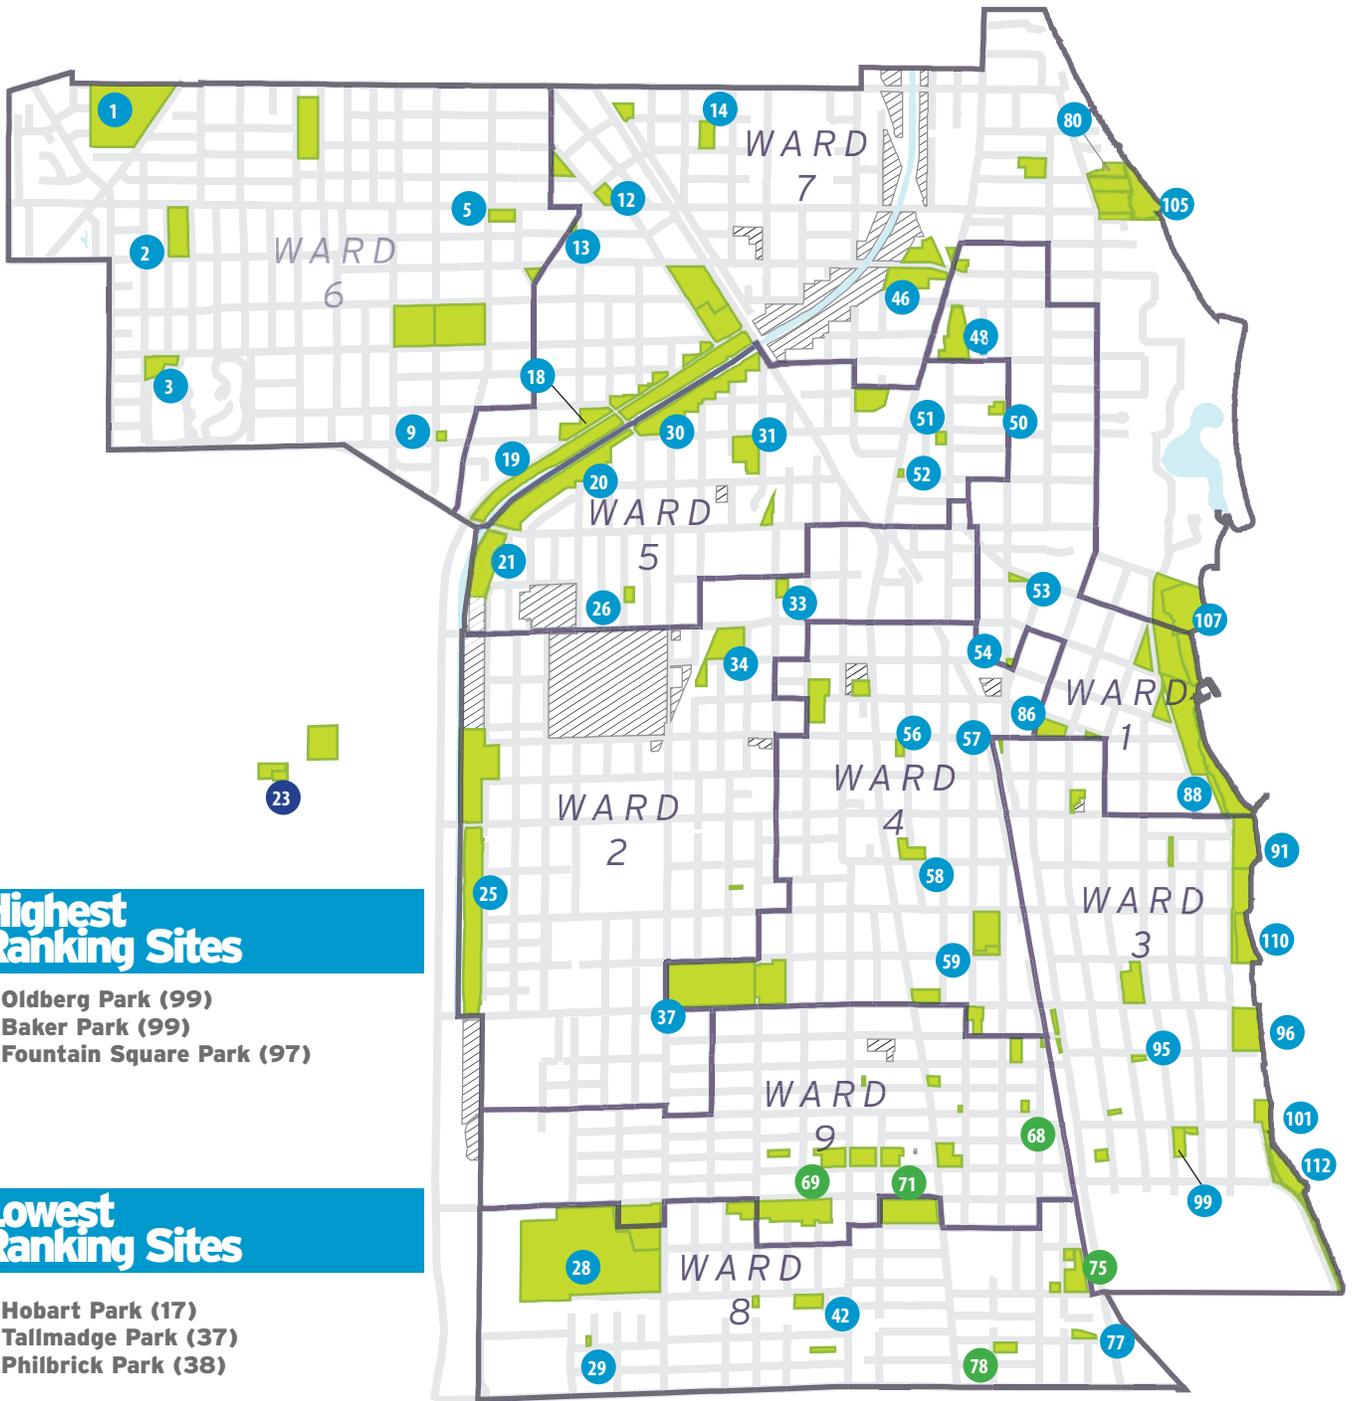

Mold and rust issues at Fitzsimmons Park

Surface issues at South Boulevard Beach

Water pressure issues at Foster Field

## PLAYGROUNDS

Foster Field Playground

### Issues Observed

### Playground Notes

Inspection included all playgrounds in a public open space, including accompanying surfacing, fencing, seating, lighting, landscaping, signage, and other play equipment.

Playground equipment deterioration was typically a result of general wear and tear from use and exposure to weather/outdoors. As the majority of deterioration issues consisted of rust and chipped or peeling paint, touch-ups to address these issues would help the overall playground score.

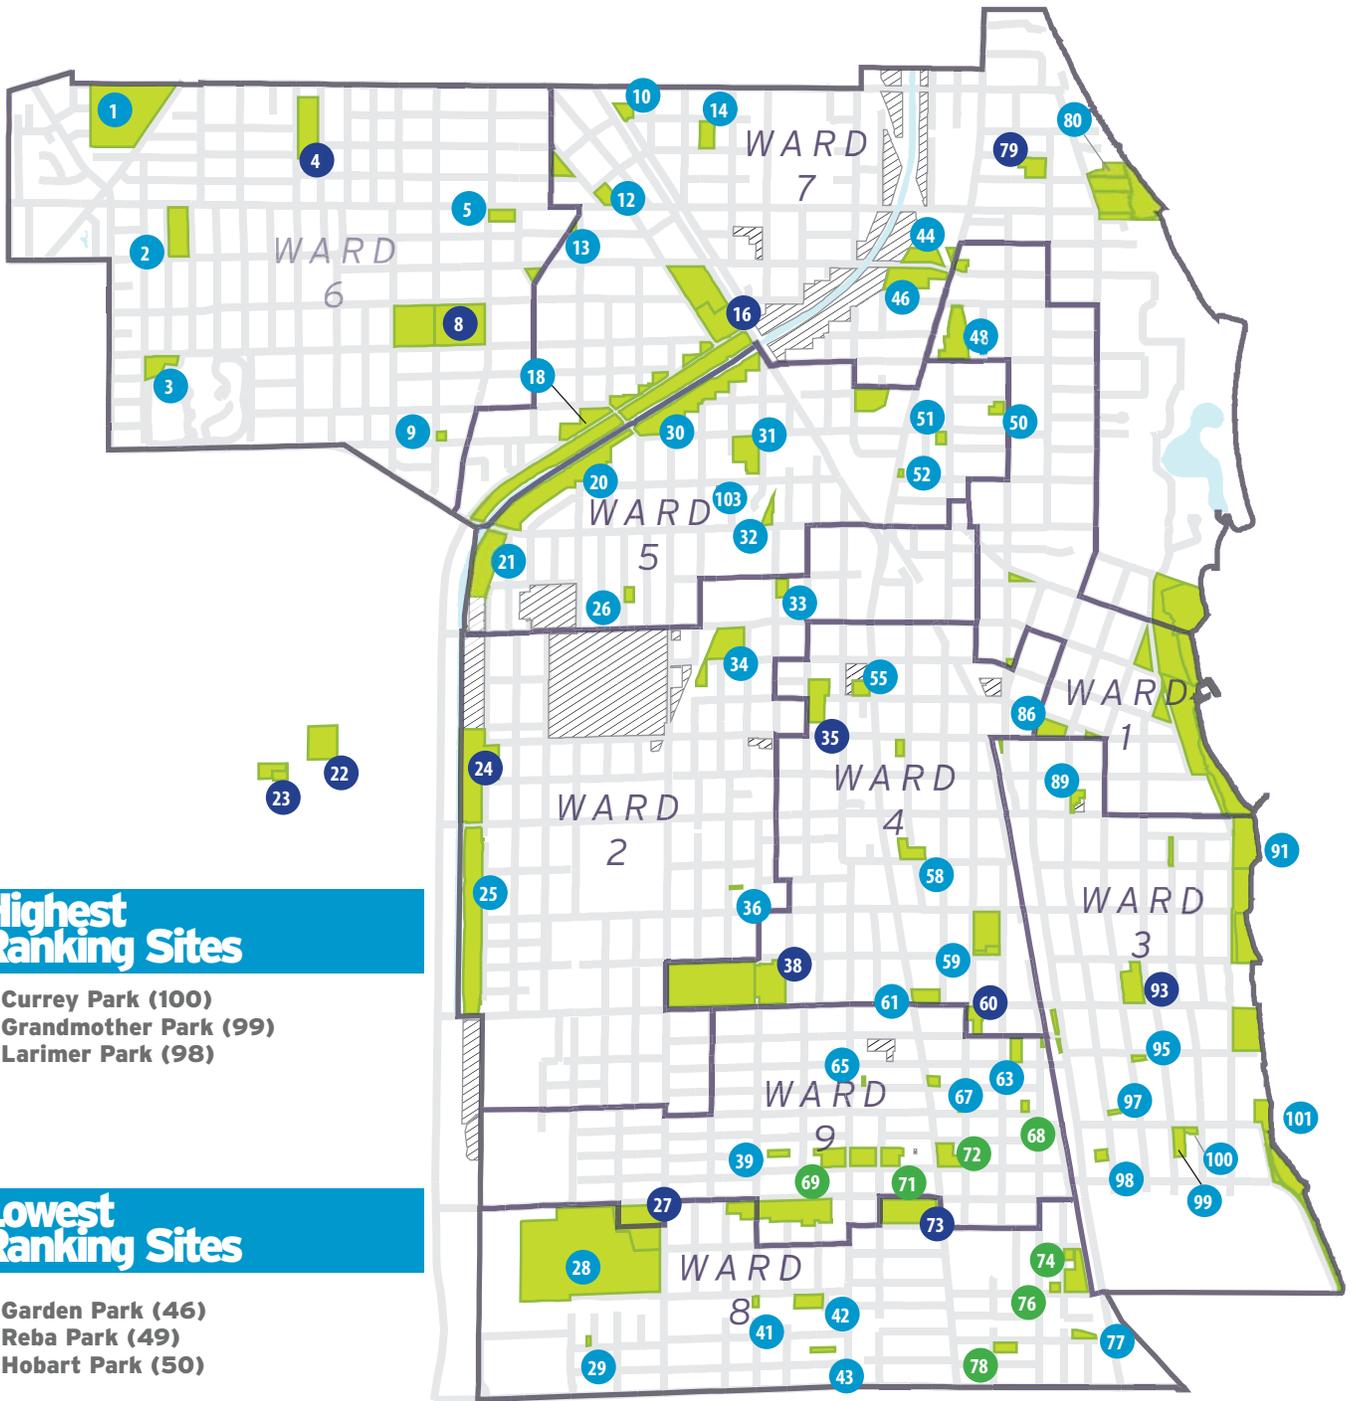

Woodchip migration at Lincoln Elementary School Playground

Reba Park Playground

Alexander Park Playground

# RESTROOMS

Well-maintained Restroom at Clark St Beach

## Issues Observed

## Restroom Notes

Inspection included all public restrooms open to park visitors on a daily basis, including signage and accompanying equipment.

In most cases, restrooms were found open and fully stocked. However, because of their importance to park visitors, minor improvements of painting/patching ceilings, walls, and windows as well as installing diaper changing stations where space allows would result in improved scores.

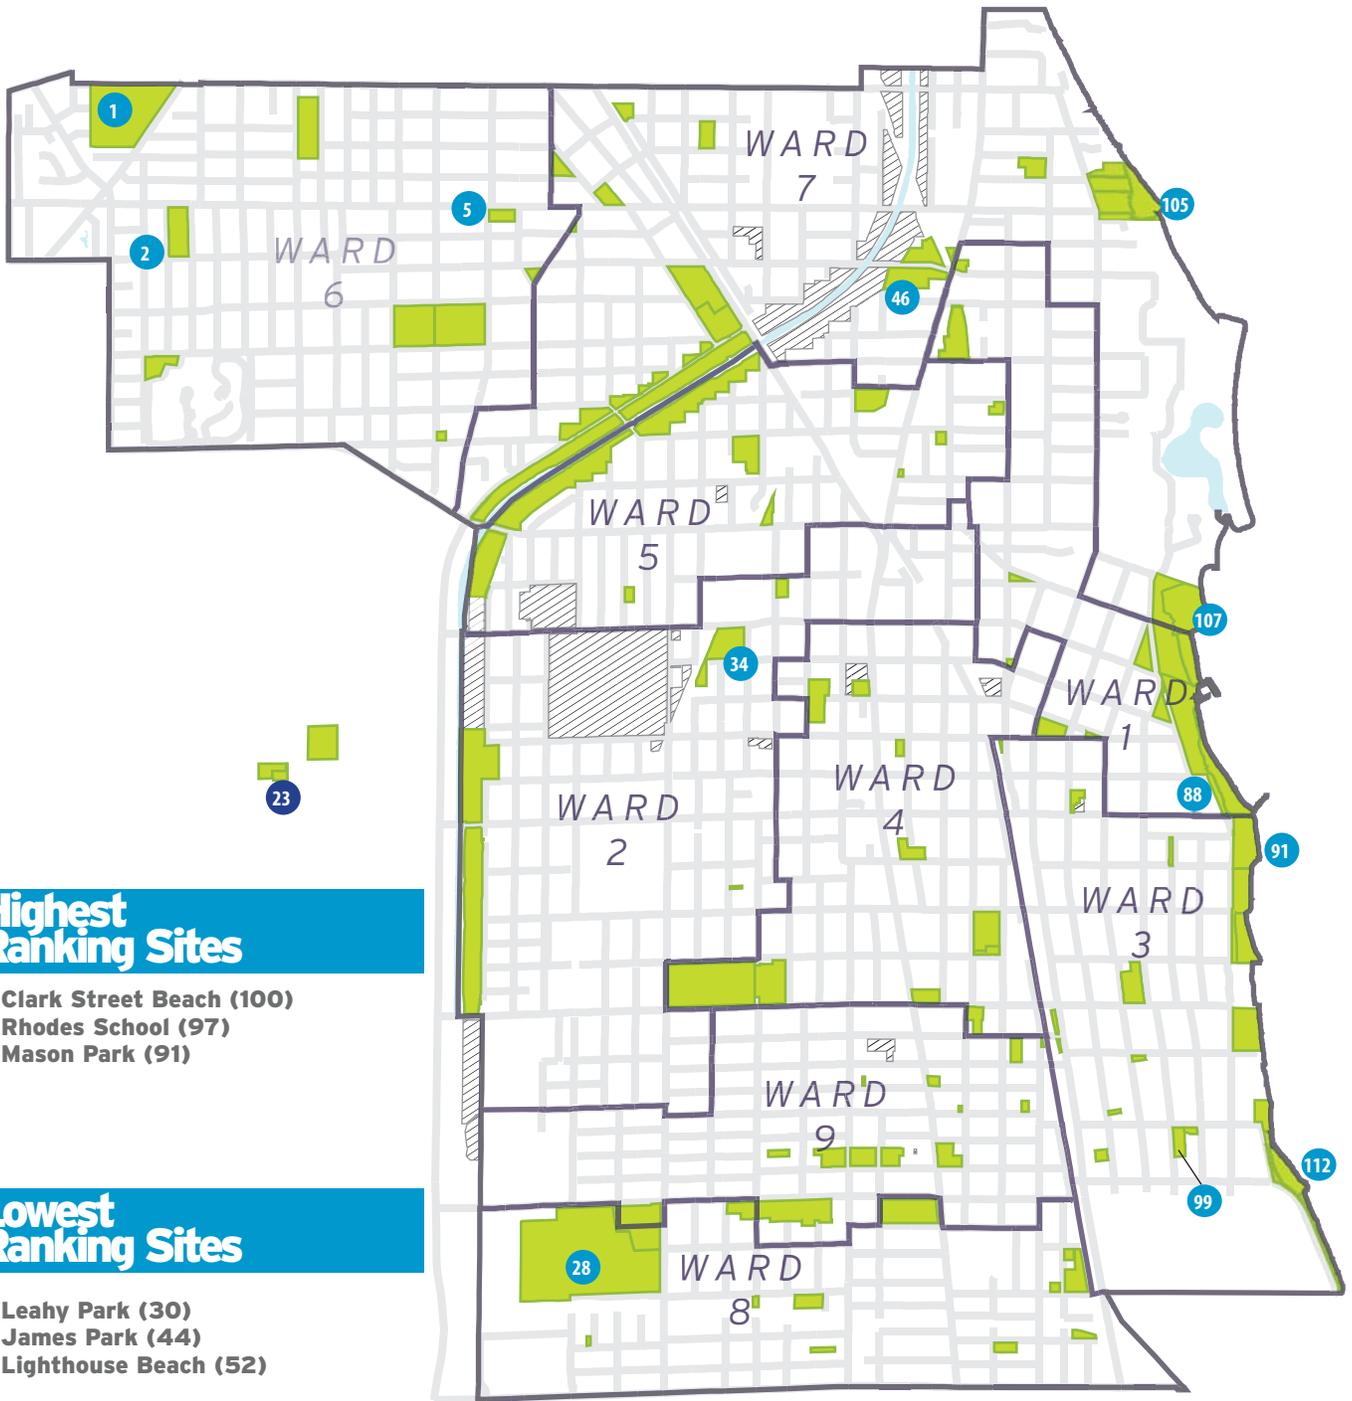

Surface issues at Lovelance Park Restroom
