

# HOWARD STREET CORRIDOR IMPROVEMENT PROJECT

## Project Overview

The City of Evanston, in cooperation with the Chicago Department of Transportation, has initiated a Phase I Study for the Howard Street Corridor Improvement Project, Dodge Avenue/California Avenue to Custer Avenue/Damen Avenue. The goals of this project include the following:

- Improve pedestrian mobility, safety and access
- Review corridor with regards to complete streets policy
- Improve transit operations and infrastructure
- Improve intersection safety and operations by upgrading and interconnecting traffic signals
- Improve vehicle mobility through corridor
- Upgrade utilities along corridor
- Incorporate streetscape elements, such as sidewalk improvements, street furniture, trees and lighting

A Howard Street Corridor Improvement Plan will be developed as part of the Phase I portion of this project. The public will have opportunities to provide input throughout 2017, as outlined below.

## Study Area
