City of Chicago Howard Street Sewer Repairs

August 8, 2017

Project Description

The Chicago Department of Water Management will perform sewer construction work on the south side of Howard Street between Asbury Avenue and Ridge Avenue. Work includes repairs to the Chicago sewer system at the three intersections of Howard Street and Claremont, Bell, and Oakley Avenues. Work is scheduled to begin the **week of August 21** and is expected to last approximately four weeks.

The contractor will be required to shift traffic to the north side of Howard in order to maintain two-way traffic (one lane in each direction) and provide a safe work zone. This will require parking to be prohibited on Howard Street near each intersection while work is underway.

Contractor

The contractor for this project is Joel Kennedy Constructing Corporation.

Project Monitoring

This project is monitored by the Chicago Department of Water Management. Questions about this work can be directed to Coordinating Engineer, Kevin Carpenter at (312) 744-3436.
