City of Evanston Public Works Agency

Bike Parking Project at Main Street CTA Station

September 22, 2017

Project Description

Over the next three to four weeks the City and the Illinois Department of Transportation (IDOT), with approval from CTA, will be contracting the bike parking project at the Main Street CTA Station. The project includes the construction of concrete pads and installation of 40 bike racks within the CTA Station grounds at Chicago Avenue and in the sidewalk on Washington Street. The existing bike racks within the CTA grounds by the sidewalk will be removed after the new bike racks have been installed. The funding for this project is shared between Federal Congestion Mitigation & Air Quality (CMAQ), Regional Transportation Authority (RTA) funds and the City of Evanston.

Construction will begin in **the first week of October, 2017** with the entire project expected to be fully completed within three weeks. The construction activities may create some inconvenience to pedestrians and transit service users, but we will attempt to minimize these inconveniences. Construction zone **NO PARKING** restrictions on the west side of Chicago Avenue in front of the CTA Station will be intermittent throughout the duration of the project.

Contractor

The contractor for this project is Sumit Construction Company Inc., 4150 W. Wrightwood Avenue, Chicago IL 60639. The contractor is contractually responsible for the means and methods of the work.

Construction Monitoring

The City has retained an engineering firm, Hampton, Lenzini & Renwick, Inc., to monitor the project. If you have any questions or concerns, please contact the Resident Engineer **Doug Paulus** at **(847) 609-4876**. Questions about the project in general should be directed to Rajeev Dahal, Senior Project Manager at **3-1-1 or (847) 448-4311**.
