Isabella Street Bridge Deck Rehabilitation Project

July 5, 2016

Over the next eight weeks the City will be completing the Isabella Street Bridge Deck Rehabilitation Project. This project includes bridge deck and approach slab rehabilitation, removal and replacement of expansion joints, curb and sidewalk repair as needed, and a latex concrete overlay including installation of new strip seal joint at the abutments. This improvement is part of the city's continuous program to improve the roadway infrastructure throughout the community.

Schedule

This project will begin the week **of July 11 2016** with a complete bridge closure for both vehicular and pedestrian traffic through **August 19, 2016**. A detour map showing the alternate route is attached on the back of this newsletter. The project will be completed by end of August including the latex concrete overlay and final restoration. The construction activities will create some inconvenience for nearby residents, but the City will attempt to minimize these inconveniences. While the bridge is closed for construction, the Chicago Transit Authority (CTA) will be performing the track repair on weekends. The street sweeping and/or neighborhood parking restrictions will be waived for a one-block radius around the construction zone.

Contractor

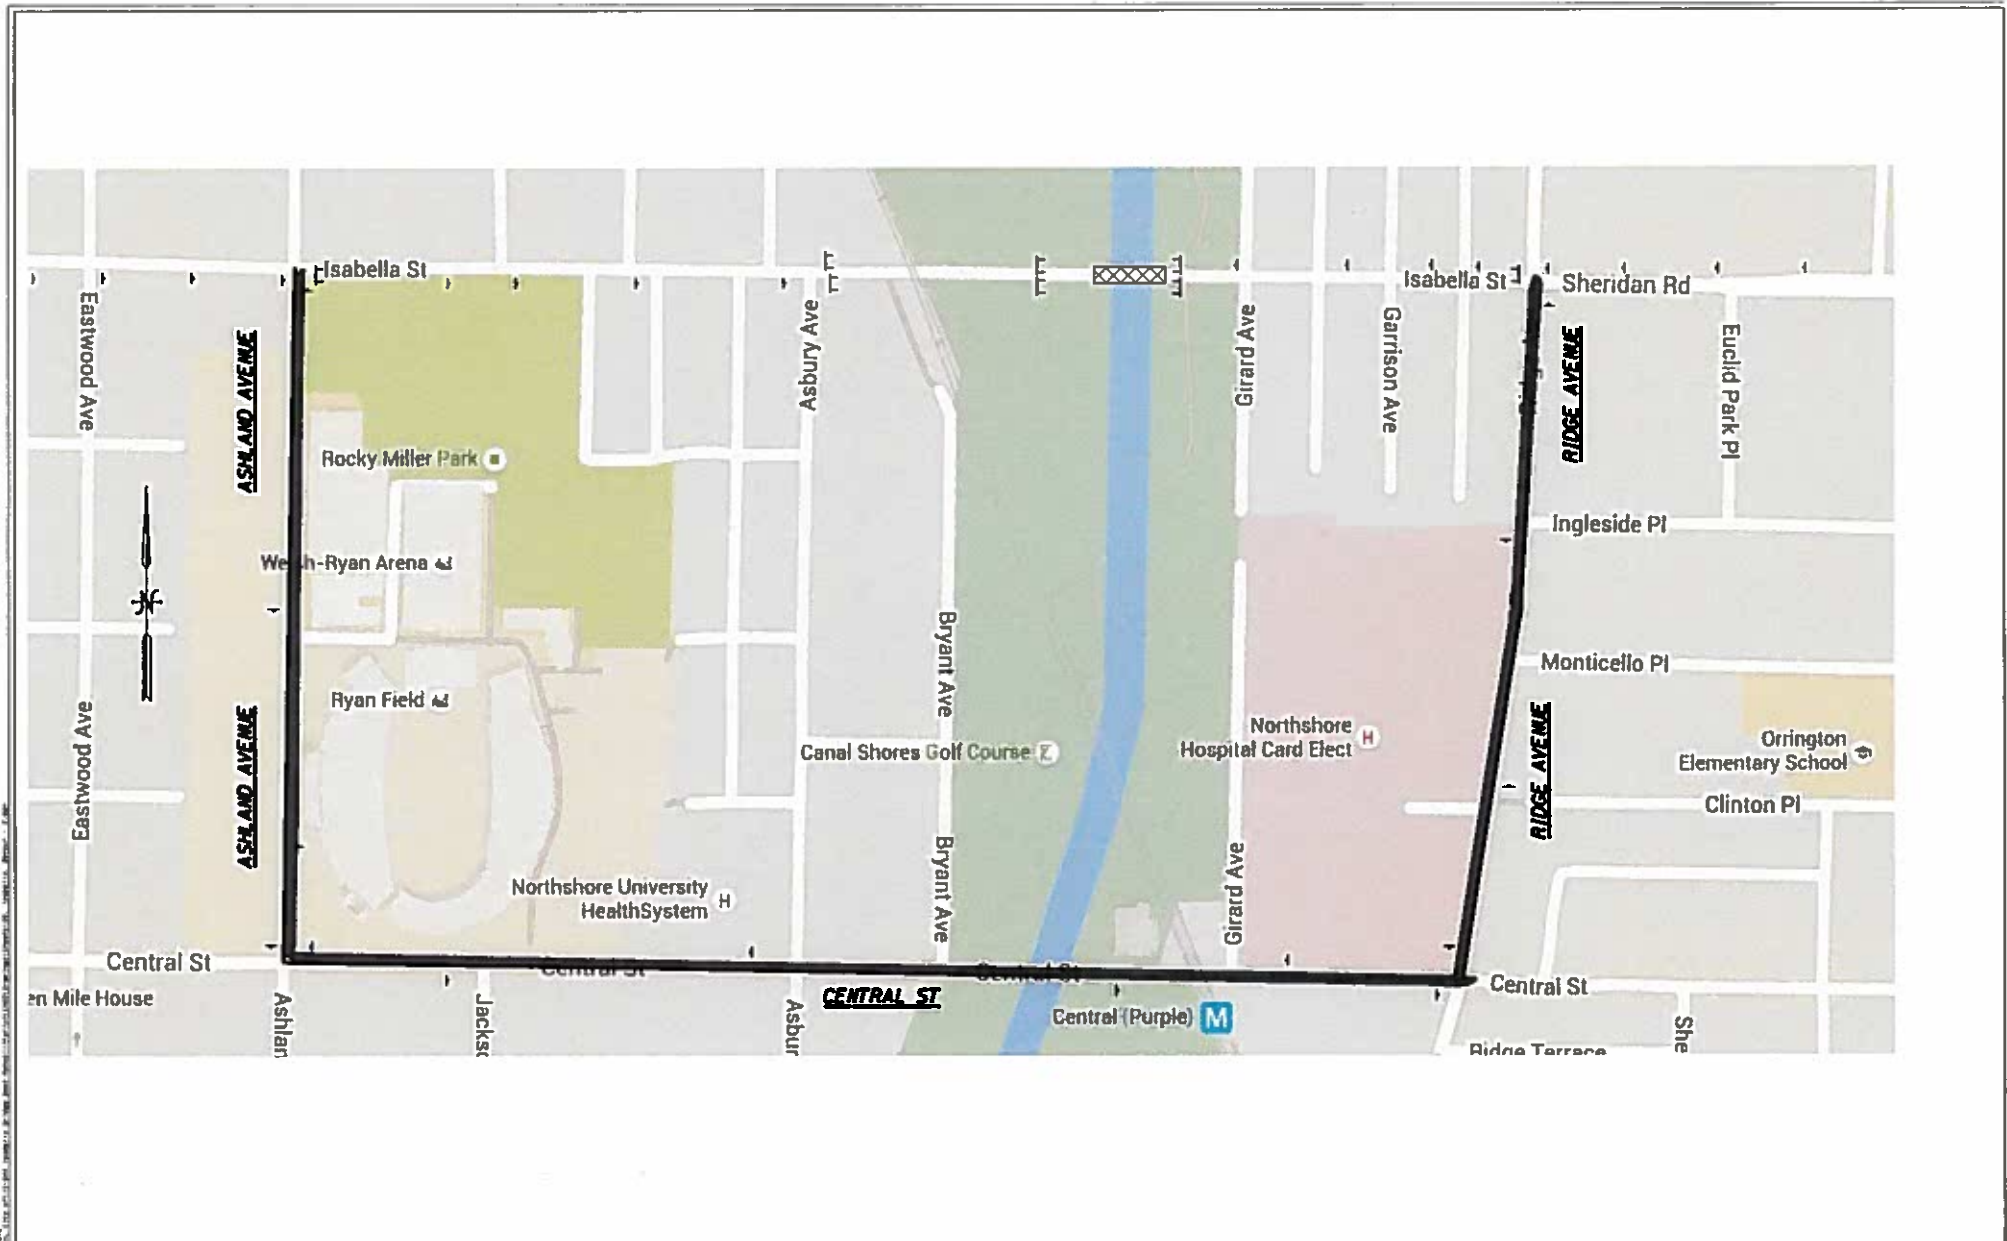

The contractor for this project is Rausch Infrastructure LLC (8700 W Bryn Mawr Avenue, Suite 830N, Chicago, IL 60646).

City Monitoring

The City has retained ESI Consultants, Ltd. to monitor the project. If you have any questions or concerns during construction, please contact the **Resident Engineer, Derek Scott, at (217) 251-9754**. Questions in general about the bridge project should be directed to Sat Nagar, P.E., Senior Project Manager at 3-1-1 or (847) 448-4311.
