12. CONTRACTOR REQUIREMENTS

- A. The Contractor shall abide by and comply with all local, State and federal laws and regulations relating to contracts involving public funds and the development/construction of public works, buildings, or facilities. The scale of wages to be paid shall be obtained from Illinois Department of Labor and posted by the Contractor in a prominent and accessible place at the project work site.
- B. The Contractor certifies it has not been barred from being awarded a contract with a unit of State or local government as a result of bid rigging or bid rotating or any similar offense (720 ILCS 5/33 E-3, E-4).
- C. The Contractor certifies, pursuant to the Illinois Human Rights Act (775 ILCS 5/2-105), that it has a written sexual harassment policy that includes, at a minimum, the following information: (1) the illegality of sexual harassment, (2) the definition of sexual harassment under State law, (3) a description of sexual harassment utilizing examples, (4) the Contractor's internal complaint process including penalties, (5) legal recourse, investigation and complaint process available through the Illinois Department of Human Rights and the Human Rights Commission and directions on how to contact both; and (6) protection against retaliation as provided by Section 6-101 of the Illinois Human Rights Act.
- D. The Contractor shall abide by the "Illinois Preference Act" which stipulates that whenever there is a period of excessive unemployment in Illinois, defined as any month immediately following two (2) consecutive months during which the level of unemployment in Illinois exceeds five percent (5%) as measured by the U.S. Bureau of Labor Statistics in its monthly publication of employment and unemployment figures, the Contractor shall employ only Illinois laborers unless otherwise exempted as so stated in the Act. ("Illinois laborer" means any person who has resided in Illinois for at least 30 days and intends to become or remain an Illinois resident) Other laborers may be used IF Illinois laborers are not available or are incapable of performing the particular type of work involved if so certified by the Contractor and approved by the project engineer.

13. EXTENSION OF TIME

- A. Delays due to causes beyond the control of the contractor other than such as reasonable would be expected to occur in connection with or during the performance of the work, may entitle the contractor to an extension of time for completing the work sufficient to compensate for such delay. No extension of time shall be granted, however, unless the contractor shall notify the City in writing thereof, within ten (10) days from the initiation of the delay and unless he shall, within ten (10) days after the expiration of the delay, notify the City in writing of the extension of time claimed on account thereof and then only to the extent, if any, allowed by the City.

14. DEFAULT

- A. The City may, subject to the provisions of this section, by written notice of default

to Contractor, terminate the whole or any part of this contract in any one of the following circumstances:

1. if the Contractor fails to perform the services within the time specified herein, or any extension thereof; or
 2. if the contractor fails to perform any of the other provisions of this contract, or so fails to make progress as to endanger performance of this contract in accordance with its terms, and in either of these two circumstances does not cure failure within a period of 10 days (or such other extended period as the City may authorize in writing) after receipt of notice from the City specifying such failure
- B. In the event the City terminates this contract in whole or in part as provided in this section, the City may procure, upon such terms and in such manner as the City may deem appropriate, services similar to those so terminated, and the Contractor will be liable to the City for any excess costs for such similar services.
- C. The Contractor will not be liable for any excess of costs if acceptable evidence has been submitted to the City that the failure to perform the contract was due to causes beyond the control and without fault or negligence of the Contractor.
- D. Contractors who default may not be considered for awards of future City contracts.

15. USE OF PREMISES

- A. The contractor shall confine his apparatus, the storage of materials and the operations of his workers, to limits indicated by law, ordinances, permits or directions of the City.

16. DISCLOSURES AND POTENTIAL CONFLICTS OF INTEREST (30 ILCS 500/50-35)

- A. The City of Evanston's Code of Ethics prohibits public officials or employees from performing or participating in an official act or action with regard to a transaction in which he has or knows he will thereafter acquire an interest for profit, without full public disclosure of such interest. This disclosure requirement extends to the spouse, children and grandchildren, and their spouses, parents and the parents of a spouse, and brothers and sisters and their spouses.

To ensure full and fair consideration of all bids, the City of Evanston requires all Bidders including owners or employees to investigate whether a potential or actual conflict of interest exists between the Bidder and the City of Evanston, its officials, and/or employees. If the Bidder discovers a potential or actual conflict of interest, the Bidder must disclose the conflict of interest in its bid, identifying the name of the City of Evanston official or employee with whom the conflict may exist, the nature of the conflict of interest, and any other relevant information. The existence of a potential or actual conflict of interest does NOT, on its own, disqualify the disclosing Bidder from consideration. Information provided by

Bidders in this regard will allow the City of Evanston to take appropriate measures to ensure the fairness of the bidding process.

The City of Evanston requires all bidders to submit a certification, enclosed with this bid packet, that the bidder has conducted the appropriate investigation and disclosed all potential or actual conflicts of interest.

By submitting a bid, all Bidders acknowledge and accept that if the City of Evanston discovers an undisclosed potential or actual conflict of interest, the City of Evanston may disqualify the Bidder and/or refer the matter to the appropriate authorities for investigation and prosecution.

TECHNICAL SPECIFICATIONS

GENERAL

Orders will be made on an as-needed basis. Invoicing shall be made at the time of each order. The Contractor must deliver within 10 calendar days of receiving the release order.

Delivery of all materials shall be made to the following location: Evanston Water Utility, 555 Lincoln Street, Evanston, Illinois.

The unit price listed on the submitted bid schedule shall be complete. Shipping, handling, delivery and all other costs shall be considered incidental to the unit price. No additional surcharges, taxes or other fees will be approved for payment.

For each product bid, submit a Safety Data Sheet with the bid package.

Each group will be awarded separately to the lowest responsive bidder for that group. Bidders need not bid on every group. However, bidders are advised to provide a unit price for every line item on the bid schedule for every group for which they are submitting a bid.

Technical questions should be submitted in writing via email to Jillian Ostman at jostman@cityofevanston.org with a copy to Darrell A. King, at dking@cityofevanston.org. Only inquiries received a minimum of seven (7) working days prior to the date set for the opening of bids, will be given any consideration.

SECURITY

Deliveries must be preceded by advanced information via facsimile 24 hours prior (when available) to arrival of shipment. Information shall include driver's name, driver's license number. Truck (tractor and trailer) numbers, seal numbers (if used) and estimated arrival time with a 2 hour delivery window. Quantity and ultimate destination information shall also be provided about products or materials on the truck which are not part of the order being filled at this location. Faxes shall be to the attention of Kevin Zeoli at (847)448-8226. Security information not known 24 hours ahead must be given at least four hours prior to delivery of product. Any deviation from advanced information may result in the rejection of the load.

Truck deliveries will be accepted between 7:00 AM and 2:30 PM on week-days. No deliveries will be accepted on Saturdays, Sundays or holidays with the exception of aluminum sulfate that may be accepted outside these hours with advance (or prior) approval.

TESTING

Due to the wide variety of coagulants, polymers and blends available and due to the difficulty in specifying proprietary products it is necessary that all polymers and blends other than those specified be properly tested and evaluated according to standardized guidelines.

The procurement process shall henceforth be modified as follows:

1. Prospective bidders proposing to supply any product other than those already approved for use in the Evanston Water Treatment Plant must run jar tests in Evanston's lab on at least two separate occasions under the supervision of the Water Treatment Plant Chemist. Arrangements shall be made with, and at the convenience of, the Chemist.
2. Each occasion of testing shall be separated in time by change in season, to allow raw water conditions to change (e.g. temperature and turbidity).
3. Jar tests performed at each occasion shall include but not be limited to one control jar which has raw water only, nothing added, and one jar of raw water with the current dosage of alum and polymer presently being used in the plant. The other four jars shall be used to test the proposed product but changing only one variable per test run.
4. Test procedure and results must be clearly outlined and recorded and copies of this data must be submitted to the Chemist on the day of the test, even if a formal report with conclusions is to be submitted at a later date.
5. Minimum data required: mixer speeds, mix times, settling times, chemical dosage in mg/l, indicate whether chemical is fed neat or diluted. The foregoing are all variables to be tested separately as outlined in item 3. Alkalinity, Ph, turbidity, temperature and the time when the sample was taken shall also be recorded.
6. Observations of the presence of the first floc, relative size and its ability to settle shall be recorded. Turbidity of settled water shall also be recorded for all samples including control.
7. The laboratory jar test area and equipment shall be cleaned and returned to the condition it was found in by the person(s) conducting the test.
8. A sample of at least 500ml of each product tested shall be left for independent testing if the city desires.
9. A written report with conclusions shall be submitted within 30 days of final testing.
10. If, based upon jar testing, the product appears viable, approval to bid on that product will be granted. However, if the vendor is the successful low bidder the vendor must supply the city with up to six 55-gallon drums of the product being proposed (unless already approved for use in Evanston's plant) at no more than the bid price per pound of bulk product delivered. This will enable the City to run a plant scale test of the product for at least one week. If the results are not

satisfactory to the City, the City reserves the right to reject the product and contract with the next low bidder, or a vendor with a proven product.

GROUP A - COAGULANTS

Bid Line #1: Aluminum Sulfate made exclusively from Alumina Trihydrate and not to exceed 75 P.P.M. of Iron Content.

Quality: Chemical to be furnished shall conform to the latest revision of Standard Specification B403 and, in addition, shall be free of any additives or detergents applied as dispersing agents. The product shall be certified and listed by ANSI/NSF as meeting the requirements of standard 60, current edition.

Shipment: Liquid alum shall be delivered in quantities of approximately 4,300 gallons and shall be received in bulk for transfer to storage tanks. Certified weight tickets shall be furnished with all deliveries of Aluminum Sulfate in liquid form. Bill of Laden number shall be listed on the weight ticket.

Price: Price should be stated for Aluminum Sulfate in Liquid form containing not less than 17% Aluminum Oxide (AL₂ O₃).

Payment: Invoices for payment for Liquid Aluminum Sulfate shall be based upon and shall contain certification as to actual concentration of AL₂ O₃ in chemical, specific gravity and weight of dry Aluminum Sulfate in the following manner:

$$\frac{NW \times C\%}{17\%} = \text{lbs. Dry Alum}$$

Where:

- NW = Net Weight in Pounds of Liquid Alum Delivered
- C = Concentration of Aluminum Oxide (AL₂ O₃) in Percent (as determined by analysis)
- 17% = A physical constant which is percentage of molecular weight of aluminum oxide in Aluminum Sulfate

EXAMPLE:

Total Net Weight of Chemical Delivered 46,000 lbs.
Concentration of AL₂ O₃ = 8.3%

$$\frac{46,000 \times .083}{.17} = 22,459 \text{ Lbs. Dry Alum}$$

Testing: Along with a weight ticket and certificate of analysis when a shipment is received, the purchaser will collect one sample of at least 500 ml. from the truck for laboratory analysis. The sample will be analyzed for acceptability and will be made available for testing by the supplier at his own expense should any discrepancies arise. Invoices will be checked against laboratory analyses for accuracy. The City reserves the right to dispose of samples 60 days after delivery.

GROUP B- LIQUID CHLORINE

Bid Line #2 & #3: Liquid Chlorine furnished shall be the product of one manufacturer. If, for any reason such as manufacturing plant shutdown, the product of another manufacturer is to be shipped to the City, prior notice shall be given to the Using Department. Special precautions should be taken to assure quality equal to that produced by the normal manufacturer. The City reserves the right to refuse delivery, when in its sole determination; it concludes that the Liquid Chlorine provided by another manufacturer does not meet the quality of the normal manufacturer.

Quality: Liquid chlorine purchased under these specifications shall be commercial grade of the highest chemical purity with an average chlorine content, over the period of the contract, of not less than 99.8% and shall contain no adulterant, or any deleterious matter. It shall contain no more than 150 parts per million of moisture. Total liquid and solid impurities, including volatile and non-volatile materials, shall not exceed an average, over the period of the contract, of 250 parts per million, and 400 parts per million in any one test lot as defined under "Test Certificate" hereinafter. The chlorine shall comply in all respects to the latest revision of AWWA Standard for liquid chlorine, B301, except as to requirements explicitly specified herein at variance with said AWWA Standard. The chlorine shall not deposit more than a slight film on the interior surfaces of evaporators, chlorinators, or chlorine pipe lines and shall not unduly clog pressure reducing valves, flow measuring devices or chlorinator control valves.

Test: The Liquid Chlorine shall be tested by the manufacturer in accordance with their standard method of testing to determine the parameters listed under quality. The manufacturer's test procedure shall be submitted to the chief of the Filtration Division for approval prior to shipping any chlorine to be delivered under this contract.

Test Certificate: The manufacturer, whether directly or through a distributor or re-packer, shall submit a Test Certificate tabulating the test results. The following schedule of tests shall be strictly adhered to:

- 1) Upon request, a manufacturer, furnishing Liquid Chlorine directly to the Using Department in one-ton containers, shall random test one (1) container per delivery. The Test Certificate shall show all pertinent data relating to the shipment and the container number, and the values for all parameters as hereinbefore specified.
- 2) A re-packer, furnishing Liquid Chlorine which has been transferred from a bulk container to one-ton containers for delivery to the using department, shall furnish a copy of the manufacturer's Test Certificate for the bulk shipment. This Test Certificate, originated by the manufacturer and showing the re-packer as the consignee, shall show the analyses of no less than two (2) samples from a 55 ton tank car. Pertinent data to show relation of the Test Certificate to the shipment of one-ton containers shall be furnished.

Containers: Liquid Chlorine shall be delivered in the Contractor's containers. The

Containers shall comply with the provisions of AWWA Standard B301. Additionally, the requirement for "Installing Valves and Fusible Plugs" specified states that "at least 1-1/2 threads show above container." Amend this so that no less than 1/2" clearance is provided between the container wall and the bottom side of the fusible plug shank. This 1/2 inch spacing is necessary to fit the safety cover as supplied in the one-ton "B" Safety Kit. Contractor shall waive all container deposit fees for the duration of this contract period.

Container Shipments: Attention is directed to current Interstate Commerce Commission regulations for shipment of Chlorine. Regulations also provide that one or more ton containers may be transported on trucks or semi-trailers when securely chocked or clamped to cradles, and provided adequate transfer facilities are available when container transfer in transit is necessary. The City reserves the right to reject any shipments due to imminent safety hazards or faulty delivery equipment. Re-delivery arising from such rejection shall be at the contractor's sole expense.

Tagging: Each container shall be tagged as required by ICC Regulations. In addition, the tag shall show the date filled, container number and tare and net weights.

Responsibility: The Using Department will be responsible for the containers and their appurtenances while they are under the Using Department's control. Cost of repair or replacement of containers damaged or lost while under the Using Department's control shall be substantiated by evidence satisfactory to the Purchasing Agent. The City will inspect all containers in the process of receiving and unloading a shipment.

Empty containers shall be returned by the Using Department in truckload lot and/or the Contractor may request return of empty containers at any time. All empty containers are to be returned to the contractor within (90) days after the expiration of the contract.

Technical Responsibility: If the Using Department incurs difficulty in the use of the Liquid Chlorine furnished under these specifications, the Contractor will immediately be notified. These difficulties could include, but not be restricted to, excessive amounts of ferric chloride, chlorine "taffy" or "gunk", or any other deleterious material which can clog valves, evaporators, chlorinators etc. The manufacturer or re-packer shall send a technical representative to the particular facility as soon as possible after notification. This representative should be qualified to assist and advise the City engineers regarding the probable cause and solution for the problem. If the City incurs excessive maintenance costs, and the cause of the difficulty can be fixed as the responsibility of the manufacturer or re-packer, the Using Department will notify the Purchasing Agent as provided under appropriate provisions specified under the General Conditions.

Shipment: Ton containers will normally be ordered in lots of eight, and 150# cylinders will normally be delivered with the ton containers as needed.

Price: Pricing of ton containers shall be for each container delivered in lots of eight tons. Pricing of the 150# cylinders shall be for single cylinders to be delivered at the same time as the ton container delivery.

Payment: Payment for goods delivered shall be made in accordance with the bid prices agreed upon. No additional surcharges, taxes or other fees will be approved for payment.

GROUP C - HYDROFLUOROSILICIC ACID - (H₂SiF₆)

Bid Line #4: Supply Hydrofluorosilicic Acid as follows.

Quality: The chemical shall conform to the latest revision of AWWA Standard Specification for Fluosilicic Acid, B703. The chemical shall be listed and certified by ANSI/NSF as meeting the requirements of Standard 60, current edition.

Shipment: Deliveries will be made in minimum quantities of 4,300 gallons for the City of Evanston. Deliveries will be received in bulk for transfer to owner's storage tank.

Price: Price should be stated for Hydrofluorosilicic acid with a minimum concentration of H₂SiF₆ of 23% by weight and the price so stated shall constitute the base price.

Payment: Certified weight tickets shall be furnished with all invoices rendered for delivery of Hydrofluorosilicic acid in bulk.

When the concentration of H₂SiF₆ exceeds the minimum 23% by weight, then base bid price shall be adjusted by the following formula:

$$\begin{array}{rcccl} \text{Invoice Price} & & \text{Percentage of Concentration} & & \\ \text{In Cents =} & & \text{of H}_2\text{SiF}_6 \text{ in the} & & \\ & & \text{Chemical as delivered} & \times & \text{Base Bid Price in} \\ & & \text{23\% (Guaranteed Minimum} & & \text{Cents per Pound} \\ & & \text{H}_2\text{SiF}_6 \text{ Concentration)} & & \end{array}$$

Invoice for payment shall include certification as to concentration of H₂SiF₆ in chemical as delivered.

Testing: Along with a weight ticket and certificate of analysis when a shipment is received, the truck driver will be required to draw a sample of the acid in sample bottle provided by the City. This sample will be analyzed to determine the percentage of H₂SiF₆ specific gravity and percentage of free acid other than H₂SiF₆. Invoices will be checked against lab analysis for accuracy. Sample will be available for testing by vendor at his own expense should any discrepancies arise. The City reserves the right to dispose of samples 60 days after delivery.

GROUP D - LIQUID CATIONIC POLYMER

Bid Line #5: Provide liquid Polydially Dimethyl Ammonium Chloride, A.K.A. pDMAAC or pDADMAC.
