1. Operation Maintenance and Replacement Charge (OM&R): The OM&R charge is levied on all users to recover the operation, maintenance and replacement costs and is computed by apportioning the annual OM&R costs less any investment income derived from operating cash per one hundred (100) cubic feet of metered water sales as recorded by City water meters. Income derived from the investment of OM&R revenues shall be used solely for the operation, maintenance and replacement of the system.

2. Capital Charge: The capital charge is levied on users to provide for capital improvement, extensions or reconstruction of the sewer collection system.
